THE FUTURE AT SATA STARTS WITH AN

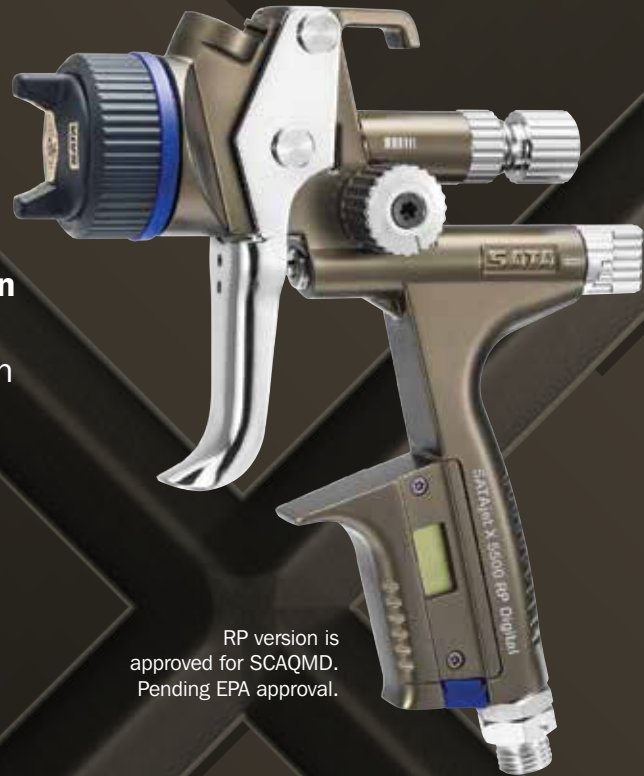

German Engineering

The revolutionary SATAjet X 5500

The Dream Team: Newly designed with synchronized air flow geometry inside the spray gun and nozzle set, ensuring **perfect material distribution, optimized atomization** and **precise spray fan shapes**. All of this combined with **material savings** and a much **softer** application with a **reduced noise level**.

Two distinct available spray fan patterns per nozzle size allows for either enhanced application control or increased application speed, as well as the adaptation of the nozzle set to different temperature and air humidity levels.

RP version is approved for SCAQMD. Pending EPA approval.

AIR FILTRATION

ARROW DRYERS

ARRPD1204XL

PneuMasterAir 2 Quart Desiccant Dryer

- Lowers the dew point to -30° F
- Includes 2 quarts of desiccant beads made of silica
- Sight glass indicates color change
- Built in after-filter prevents down stream dust
- The unit is rated for 25 SCFM

This 2 quart desiccant dryer/filter removes all water vapor by lowering the dew point to -30° F. When the beads change from blue to pink, it is time to change the beads. The unit includes two quarts of desiccant.

ARRPMA-10

PneuMasterAir Mini Disposable Desiccant Dryer

- Ideal for paint spray guns
- Lightweight unit, 1/4" NPTs can be used in either direction
- Removes dirt, oil, water vapor, and desiccant dust
- Desiccant beads lower the dew point to -30° F
- Replace when desiccant beads turn from blue to pink
- Attach this unit directly to a spray gun or mini regulator located at the gun. Sintered bronze elements remove particulate down to 40 micron as oil removing media removes oil vapors. Rated at 15 SCFM and 125 PSI.

MMM26340	48mm x 55m bulk (2")	12

3M™ Automotive Attachment Tape, Gray

- .030" thick gray acrylic foam tape with proven performance acrylic adhesive and a red release liner
- Characterized by good peel and shear adhesion, good internal strength, conformability and good plasticizer resistance
- Typical applications would include the attachment of lightweight vehicle nameplates and trim, including narrow and light body side moldings

This is not recommended for medium to heavy weight trim attachment.

MMM6377 - 1/2" x 20 yds.

MMM6378 - 7/8" x 20 yds.

3M™ Automotive Refinish Masking Tape

- Designed to meet today's paint technicians requirements for masking before painting
- No adhesive transfer
- No edge lifting
- Waterborne paint system compatible

TAPE

3M

MMM6297

3M™ Soft Edge Foam Masking Tape (D.A.R.T.) 12mm

- A foam tape designed to be used in masking door jambs, hood or deck lid openings or other areas of a vehicle which need to be sealed during the painting operation
- Unique adhesive allows material to be repositioned
- Eliminates rework due to unwanted tape lines
- Provides a "soft edge" to prevent tape lines in the jamb areas
- 12mm (1/2") diameter x 54.6 yards (50 meters)

Applications include: hood and trunk, doors, door jambs, gas caps, other openings and in the engine compartment.

MMM6298

3M™ Soft Edge Foam Masking Tape (D.A.R.T.) 19mm

- 19mm (3/4") diameter 27.3 yards (25 meters)

3M™ Trim Masking Tape, 50.8mm x 10m

- 7mm wide hard band designed to actually lift up the molding from the vehicle, allowing paint to flow under the molding
- This tape works particularly well on flush mount windshield and back glass moldings

The firm strip of this tape is slid under the molding. The liner on the remaining adhesive side is then removed and the tape is folded over and adhered to the glass, actually lifting up the molding and allowing paint to flow under it. This tape saves time, labor, and the cost of removing and installing new moldings, plus the removal of paint lines on existing moldings.

MMM6347 - 7mm Hard Band

MMM6348 - 15mm Hard Band

MMM6349 - 10mm Hard Band

MMM6951

Post-It® Labeling Tape 695, 2" x 36 yds, White

- Secure yet removable tape for temporary labeling and copy blockout
- This tape has a white paper backing with a low-tack acrylic adhesive
- Use anywhere - label bins, shelves and drawers, sticks firmly, removes easily

PAINT DRYING

SAT217489 Lightweight Blow Gun Makes Quick Work of Drying Waterborne Material

- Lightweight blow gun makes quick work of drying waterborne material
- A special nozzle design multiplies air volume from ambient air using the venturi injection principle
- An air intake filter prevents contamination of paint material
- Air consumption is only 9.5 CFM at 35 psi
- The CFM is magnified to 10x to give 92.35 CFM output
- 1 year warranty on material and workmanship

PAINT DRYING, CURING AND SHAKING

DENDF-EZAP StaticZAP Anti-Static Device

- Keeps the surface clean during the paint process to avoid unnecessary reworking and buffing
- Incorporates the efficiency and power of an air amplifier with the proven technology of corona ionization to produce a highly effective anti-static blow-off gun.
- Perform the anti-static blow off before starting and at every stage in the painting process to eliminate fisheyes and produce a finish that looks like glass.
- The two-minute anti-static process will reduce the time needed for wet sanding and buffing which saves time on prep work and also cuts down on labor and materials.
- 1 year warranty on material and workmanship

- Advanced air drying technology for shop use
- Lightweight, easy to install, and simple-to-operate
- Maintains -40° F dew point while achieving 0% compressed air humidity
- Removes oil and sub-micron particles down to .01 micron
- Stage 1 filter provides removal of water and contaminants down to 5 micron. Stage 2 coalescer provides removal of oil and sub-microns particles down to .01 microns; Stage 3 membrane dryer is maintenance free, no regeneration required.

INFSRU1615

1500W Infrared Heat Lamp Portable Curing System, 120 Volt

- UL Listed
- The most economical infrared heaters on the market
- Heavy-duty construction can stand up to the punishing conditions in any body shop
- 1,500 watts of power
- Covers up to 24 square feet

Available in 120 or 240 volts, this portable unit comes with a heavy-duty stand and casters. Its stand adjusts to 6' tall. The SRU-1615 is dependable, versatile and unbelievably affordable. Maybe that's why over one million "Speed-Rays" have been sold. The SRU-3215 is the same great unit as the SRU-1615 except it has two heads instead of one. This doubles the amount of coverage to 24 square feet. These units are suitable for use with all automotive-type finishes. Ideal for small spot repair and curing body filler.

Dura-Block
The Perfect Finishing Tools

TADAF44HL

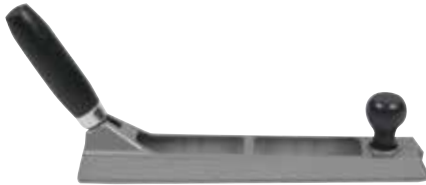

7 Piece Dura-Block Hook and Loop Sanding Blocks

- Dura-Block conforms to the panel curve
- Will not dig into fill material
- Hook and loop allows use of money saving hook and loop paper
- Known worldwide as the gold standard in blocks
- Product is machined to a perfect, flat finish

Contains the most popular Dura-Blocks in money saving Hook and Loop attachment. This allows reuse of paper when changing grits. The patented materials used in Dura-Blocks allow them to conform to the panel curve yet the surface hardness prevents digging into fill materials. Simply the best blocks available.

FRAME MEASUREMENT

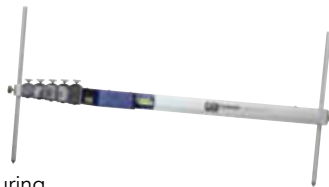

DENDF3D

Digital Measuring Tram

- Taking point-to-point measurements from 1 to 12 feet (300-3640 mm)
- The tram user can measure in feet, inches, 1/16's of an inch and metric measurements with the touch of a button
- The zeroing function enables you to take comparison measurements, displaying the appropriate positive or negative reading
- Placing the center pointer on the prescribed 400 mm mark, measurements shorter than the collapsed length of the tram can be made

Includes: 3 350mm long pointers; 2 110mm short pointers; 2 bullet pointers, 2 pointer holders, 2 cones for zeroing out larger holes all stored in a plastic carrying case.

DENDF-3TC3

9' Short Measuring Tram

- Quick, easy one person measuring
- Accurate
- Internal Tape
- Telescopic
- Lightweight aluminum sectional body

No need to add up sections, the internal tape reads out through a display window. Extruded aluminum sections make this tram light weight yet rigid when fully extended. This tram extends to almost 10 feet, is accurate to +/- 2 mm.

DENDF3

Measuring Tram Gauge

- Manufactured in Switzerland, this extruded aluminum tram is lightweight yet remains rigid when fully extended
- The telescoping design allows for confident one-person operation
- Standard and metric measurements are read easily through a large display window
- Take point to point measurement from 3 to 10-1/2 feet (950-3250 mm)
- Only extend as much as you need; No sections to add up
- 1 year warranty on material and workmanship

FRAME MEASUREMENT

KILART90MINI Mini Squaring Tram

- Rigid telescopic tubing
- Extends 20" to 58"
- Easily fits under the hoods of small vehicles like Honda Fit
- Comes with 2.5" & 2.12" calibrated pointers and nylon bag
- Built in the U.S.A.

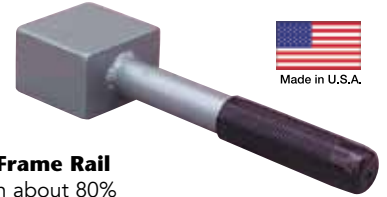

KILART90AS Tram Gauge Cone Adapter Set

- All cones are self-centering for accuracy
- 2 cones for holes up to 40mm
- 4 reverse cones for bolts and nuts up to 19mm

- See EZ to read metric/British measurements through viewing window
- MEASURING TRAM - Telescoping aluminum tram gauge with steel locking screws and viewing window.
- VERSATILE - Right angle pointer allows for short measurements under tram length.

MOC5710 Mo-Block™ Dolly for Frame Rail

- Straighten frame rails in about 80% of front-end damage cases
- Inserted into the frame rail pocket, the dolly straightens the high strength, low-alloy metal easily and quickly
- This Dolly design keeps hands and fingers safely away from the impact area

MOC7050 2-1/2" to 7' Baby Tram Gauge with Case

- Measures from 2" (65mm) to 7 ft. (2.1m)
- Level bubble installed in sliding head for accuracy in measurement
- Includes hard plastic storage case

The Tram Instrument makes it easy to establish dimensions around components and to check contours by comparing measurements from one side of the vehicle to the other. This tram instrument is a versatile and indispensable tool for determining collision damage to uni-body cars and for checking critical measurements during repair.

DENDF-900DX

Aluspot Deluxe Aluminum Repair Station

- Everything you need to repair aluminum panels
- The most complete aluminum repair station from a name you know and trust
- The capacitor discharge welder is 110 volt powered. Re-charge time for the capacitors is less than 3 seconds. The ground is on the weld gun itself
- The fact that we have two ground points on either side of the weld gun also leads to a more successful weld rate

Everything you need is included:

Hammers, nylon & polished steel dollies, infrared temp gauge, digital heat gun, instructional CD and storage cart and 110 volt Alu-Spot welder. The DF-900DX includes everything found in the DF-900A but also includes a bridge puller, 3rd drawer and dust cover.

DENDF-900B

Aluspot Mini - Aluminum Repair System

- The DF-900B Mini Aluspot Repair System from Dent Fix Equipment is designed to operate as the main unit or as satellite unit
- The Aluspot Mini utilizes some of the same Dent Fix innovations and premier equipment as the larger Aluspot systems but at a fraction of the price
- Now, any shop can invest in the future and start repairing minor to moderately damaged aluminum panels
- Although the kit includes all the basics a shop will need to start repairing aluminum, shops can purchase additional pieces separately to expand their aluminum repair capabilities

BODY SHEET METAL

DENDF15DX Spot Annihilator Spot Weld Drill Kit

- Applies cutting pressure for you, no need to push
- Depth adjustable, cut out only the spot weld
- 1,000 rpm, for harder steels in todays cars

The drill applies all the needed cutting pressure to remove spot weld quickly and easily. The C-clamp is removable to access spot welds in floor panels and other hard to reach areas. The large depth adjustment ring controls how far the drill is allowed into the panel. This ensures that only the top panel is drilled, leaving the underlying panel clean and ready. The drill spins at 1000 rpm ideal for longevity of the bits and for the new Boron Steel (UHSS) panels.
